

DecoWood Colour Series

With over 150 DecoWood woodgrain finishes available, there is always a colour to match your project. To help guide your colour selection, we have developed the exclusive DecoWood Colour Series featuring a range of our favourite native, contemporary and exotic timber species. The series includes 30 natural woodgrain finishes that represent timbers from across the world. If your preferred timber finish is not listed, contact us so we can colour match a finish to suit your project needs.

Please note: Colours and finishes displayed on this website are a guide only and may vary from the actual product colour, grain pattern and finish. Please request a free sample to make your final selection.
